ABOUT

Frontend developer with hands-on experience building responsive, high-performance web apps using **JavaScript, React, Next.js, and TypeScript**. Skilled at designing user interfaces, integrating APIs, and optimizing performance.

Expanded into **Blockchain Development using Solidity**, focused on smart contracts and dApp integration. Completed Web3Bridge, a hands-on blockchain development program.

Passionate about building efficient, user-friendly applications and constantly improving how I work through modern tools and best practices.

EXPERIENCE

Front-End Developer | Sparkling Touch UK

JUNE 2023 - AUGUST 2023

- Collaborated with backend engineers to debug application issues and confirm fixes.
- Contributed to improved user experience, resulting in a **40% increase in user satisfaction**.
- Supported deployment and ensured stable releases through version control and testing.
- Kept the app consistent across devices through systematic testing, increasing speed and reliability.
- Designed and built major features using **React, JavaScript, and modern frontend tools**.
- Optimized application responsiveness and loading speed.
- Led deployment and maintenance, shipping continuous updates based on user feedback and analytics.

COLLABORATIVE PROJECTS

Front-End Developer | OJE Home of Herbs

SEPTEMBER 2022 - PRESENT

- Performed debugging and issue reproduction for customer-reported issues to improve reliability.
- Contributed to improved system performance, resulting in a **40% increase in user satisfaction**.
- Collaborated with product and UX teams to gather technical insights and improve the user journey.
- Improved platform performance by **reducing load time by 20%** through optimization.
- Designed and built major features using **React, JavaScript, and modern frontend frameworks**.
- Took part in deployment cycles and updates using Git-based workflows.

Front-End Developer | Peoplefirst Partners LTD

2025 - PRESENT

- Built and deployed the full company website for a UK-based HR consulting client using **React, TypeScript, and Vite**.
- Set up Sanity CMS for the blog and Resend for transactional email and newsletters.
- Configured custom domain, DNS, and business email through Cloudflare.
- Built a three-tab contact form and a company profile PDF download feature.

Frontend Developer | Gridee

DECENTRALIZED SOLAR ENERGY PLATFORM

- Built the landing page and frontend for a platform giving Nigerian communities access to solar energy.
- Worked with an ERC-20 token (GRD) using **React, Tailwind CSS, and Solidity**.

Frontend Developer | Vault.AI

WEB3 DASHBOARD

- Built a crypto dashboard page for managing AI agent wallet permissions using **React, viem, and EIP-712** signing.

Frontend Developer | FuelSpotter NG

REAL-TIME FUEL AVAILABILITY TRACKER

- Built an app that helps people in Lagos find nearby fuel stations with live, crowd-sourced availability, using **Next.js 14, Supabase real-time, and Leaflet/OSRM**.

Developer | JAMB Smart Study Planner

EXAM PREP APP

- Built a study planner with a 130-question quiz engine, XP/level system, and streak tracking, using **React, Vite, and Tailwind CSS**.

Developer | Flow-State

MONAD BLITZ LAGOS 2026 HACKATHON

- Built a protocol that streams ride payments per second instead of one lump sum, on the Monad blockchain.

EDUCATION

National Institute Of Information and Technology (NIIT) | Software Engineering

FEBRUARY 2023 – AUGUST 2025

Web3Bridge | Blockchain Development Program

2025

SKILLS & SOFTWARE

- | | | |
|------------------|--------------|---------------------|
| • Website Design | • HTML & CSS | • Tailwind CSS |
| • Next.js | • React | • Supabase |
| • JavaScript | • TypeScript | • Sanity CMS |
| • Git/Github | • APIs | • Vercel/Cloudflare |

SOFT SKILLS

- Strong communication & documentation
- Analytical and problem-solving mindset
- Attention to detail
- Collaboration with developers and cross-functional teams
- Ability to learn new technologies quickly

BLOCKCHAIN DEVELOPMENT

- Solidity (Smart Contract Development)
- Smart Contract Testing
- EVM fundamentals and opcodes
- dApp integration (viem, wallet connections)
- Account abstraction (ERC-4337) and token standards (ERC-20)
- Smart contract security review
